

## **Manager - Project Development**

### **About Tyr Energy Development Renewables, LLC**

Tyr Energy Development Renewables, LLC ("TED Renewables") is a wholly owned affiliate of Tyr Energy. Tyr Energy represents the North American cornerstone of the ITOCHU Corporation global electric power strategy, focused on clean and renewable generation and technology solutions.

TED Renewables is active in the development and commercialization of renewable electric power facilities. Through ITOCHU affiliates we provide comprehensive management and oversight services to power generation and electric utility companies.

### **Position Description**

TED Renewables is seeking a Manager - Project Development to join our new and rapidly growing renewable energy development company. The primary focus of this role is leading greenfield development of grid-scale solar and battery storage projects. As a key member of TED Renewables' development team, you will report directly to the Chief Development Officer and work to advance development of existing project portfolio as well as new greenfield prospects.

### **Duties and responsibilities:**

- Lead development activities of grid-scale solar energy and battery storage projects from feasibility to the start of construction.
- Collaborate effectively with the Development, Origination, EPC, and Interconnection teams.
- Engage with staff and third-party consultants to coordinate environmental, permitting, transmission interconnection, land acquisition, and design activities.
- Ensure projects are progressing on schedule and within budget.
- Obtain local project permits and tax agreements.
- Select, manage, and direct third party consultants and review their work product.
- Engage with landowners and stakeholders to provide information throughout the development process.
- Evaluate viability of early stage and acquisition projects.
- Conduct site visits to define site characteristics and develop relationships with local stakeholders.
- Represent TED in industry advocacy groups.
- Remain abreast of renewable energy opportunities in the United States and industry trends impacting the future of solar, BESS and renewable development opportunities and their competitiveness as they relate to customers and offtake agreements.
- Carry out other duties as assigned.

## Qualifications/Requirements

- At least five (5) years of work experience at a leading IPP, utility, or renewable developer with significant experience in greenfield project development.
- Proven record of accomplishment in solar or renewable energy development.
- Bachelor's with a focus in engineering, environmental, business administration or economics preferred.
- Demonstrated ability to identify and resolve potential project flaws and to prioritize critical path tasks.
- Thorough understanding of land easements/leases and title curative requirements.
- Track record of successfully working with public officials to obtain development permits, tax abatements, etc.
- Working knowledge of technical development disciplines, including interconnection, resource assessment, solar system and BESS operation, GIS, etc.
- Professional presence and strong communication skills.
- Ability to manage and develop junior talent.
- Current knowledge of renewable energy markets and key drivers (e.g., policies, technologies, dynamics in local markets), especially for solar and storage.
- Ability to succeed in a fast-paced, entrepreneurial office environment.
